

Addiction Treatment Services

Do you, or someone you know, battle with substance use disorder, including problems with prescription medications, alcohol, and other drugs?

Packard Health's treatment services are based on the latest models of care, and delivered with compassion and respect. Our team is experienced and certified in addiction treatment, and committed to achieving positive outcomes for our patients.

Services Include:

- > Clinical assessments
- > Brief intervention/psycho-education
- >Addiction consultations / Addiction follow-up
- > Mutual aid group resources
- > Referral to outpatient treatment
- > Referral to outpatient psychiatry/therapy

Are you struggling with opioids?

OxyContin, Percocet and Vicodin, heroin, Fentanyl

Packard Health's Medically-Assisted Treatment (MAT) Program

combines medications with behavioral therapies, a treatment proven to be effective, and that can help some people to sustain recovery. Our doctors are certified to prescribe buprenorphine (Suboxone) as indicated for maintenance treatment, in combination with counseling.

Packard Health is a community health center, promoting access to health and wellness for all ages. We provide high-quality, affordable primary care and mental health care, complemented by a broad range of fully integrated support services. We care for patients at every stage of life and believe that everyone deserves access to health care.
